Modular 3D Porcelain and Ceramic Tiles

Inspired by the earth diversity and colours

Modular 3D Porcelain and Ceramic Tiles

ABOUT US

Native Art is a registered trademark of İlksem Mühendislik Ar-Ge Seramik San. Tic. Ltd. Şti., which was founded in 2013 as a technopark company to carry out R&D activities related to ceramic products. Our brand; it has borned as a result of R&D and design studies to contribute to sustainable production by reducing the use of natural resources. In our products, secondary and recycling raw materials are used at varying rates. Native Art has offer wide colour range and design possibility with production capacity of ceramic, porcelain and terracotta to its customers.

Our company; since 2016, it has been producing Native Art products developed as a result of R&D activities. In a short time, it has reached a capacity that can produce modular and handmade, three-dimensional porcelain, ceramic and terracotta coating materials for special architectural projects by developing its product range, model, colour and glaze diversity. It has a production capacity of 72.000 m² per year with its factory of 2500 m² in total, 1000 m² of which is closed and 1500 m² of open area.

Native Art ceramic and porcelain product series suitable for wet spaces are completely handmade and add aesthetics to your living spaces with their easy-to-clean glossy glazed surface and custom hand decoration.

Clay-based terracotta series is suitable for interior and exterior decorative areas. Its designs are modern and culturally inspired. Native Art terracotta offers special designs for architectural projects by combining the texture of the soil and the colors of nature with art.

The restoration works have realized with the "Native Art Cultural Heritage Series" carry the traces of the past to the present. The tiles and ceramics of the period, which were developed in accordance with the original with R&D studies, maintain the magnificence of history.

Our vision is to be a leading and reliable company in the sector, which makes scientific knowledge usable in the industry with the innovative and academic perspective of our expert staff, produces environmentalist, innovative, awareness-raising projects and products in its field.

Our mission is to produce porcelain and ceramic coating materials and projects with environmentalist, aesthetic and technical features according to architectural projects.

Our Values

- * Reliability
- * Originality
- * High quality and efficiency
- * Usefulness
- * Environmental awareness
- * To be a problem solver and to cooperate for the solution

WHAT IS INDUSTRIAL SYMBIOSIS?

Industrial symbiosis is the process by which the waste or by-products of one industry or industrial process become the raw material of another industry. The application of this concept enables a more sustainable use of materials and contributes to the creation of a circular economy.

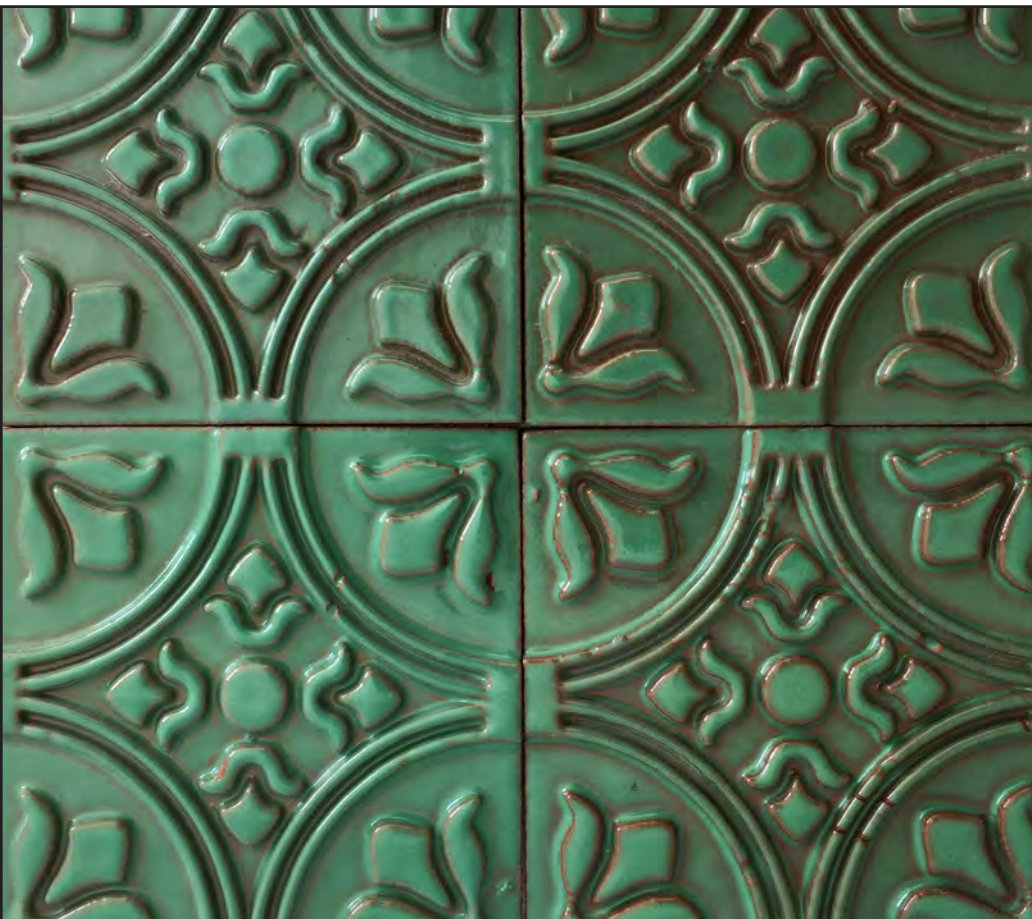

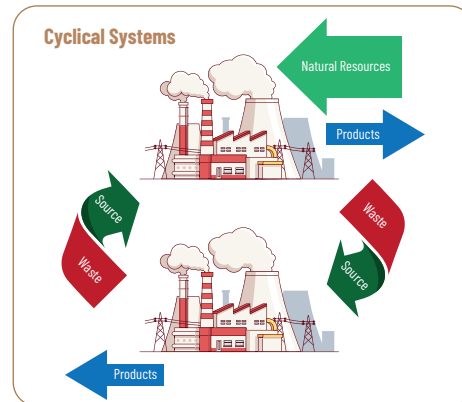

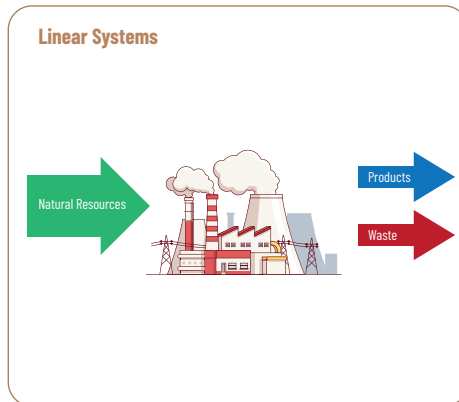

The transition to such an economy is necessary for our world where resources are increasingly depleted as it will result in increased economic competitiveness, sustainability, resource efficiency and resource security.

Industrial symbiosis creates an interconnected network that tries to mimic the functioning of ecological systems in which energy and materials are constantly converted without any waste products being produced. It aims to reduce the use of primary raw materials and increase the use of secondary raw materials.

Thus industrial symbiosis,

- * Contributes to zero waste generation.
- * It reduces the use of natural resources.
- * Provides efficient use of natural resources.
- * Reduces the needs such as landfill and disposal of wastes for wastes.
- * Allows value to be created from disposable materials, so the materials remain economically valuable for longer than traditional industrial systems.
- * Contributes to the reduction of greenhouse gas emissions.
- * Serves to reduce the environmental footprint of related industries.

Examples of industrial symbiosis are extensive. Examples of industrial symbiosis include the use of waste heat from an industry to hot greenhouses for food production, the recovery of car tire chips for use in construction materials, and the use of sludge from fish farms as agricultural fertilizers.

CERAMIC TILES

An artistic touch to your living spaces...

Our clay-based Terracotta and ceramic Stoneware product group is suitable for interior and exterior use. It is completely handmade and its designs bear modern and cultural influences.

We offer special designs for your projects by combining the texture of the soil and the colors of nature with art.

We carry **THE TRACES of** *OLD TIMES to the* **FUTURE**

Native Art manufactures period tile-brick mixed tile mosaics, Iznik tiles in accordance with their originals, in restoration works carried out to protect our cultural heritage.

For this purpose, intensive R&D studies are carried out with a team of experts with many studies, technical and academic knowledge about period tiles.

Handmade tiles produced with intensive effort ensure that our cultural heritage is transferred to the next generations with the same majesty.

Iznik Tile Series

Tile art was founded in the 14th century and, in the 15th century he lived in the golden period by finding life in the master hands in Iznik. Tile art is not only technically and aesthetically perfect, but also unique in its deep meanings. The roses and gorges in the patterns symbolize the smell of the Prophet's skin, love and beauty. The fact that the word tulip contains the same letters as the word Allah in Ottoman indicates the unity of Allah.

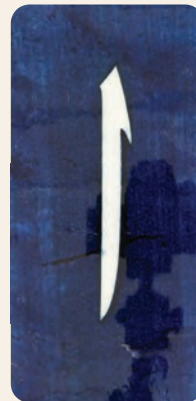

In Native Art, the original Iznik tiles are produced in accordance with the structure of technical structure and aesthetic pattern studies are carried out inspired by our culture.

THE TIMELESS HERITAGE
of modern times...

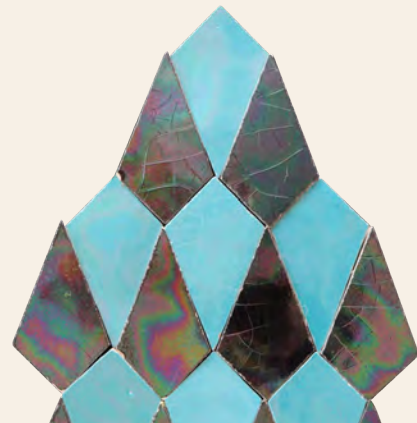

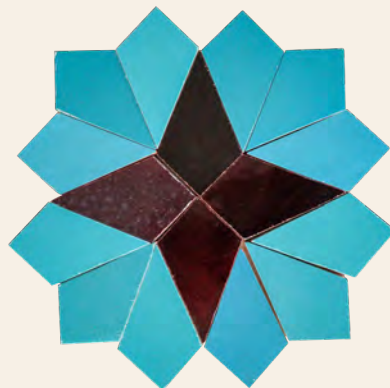

Cultural Heritage Series

Cultural heritage, belonging to a community, are long-term shares in that society. It represents our history, our identity, our connection to the past, to the present and to the future. The Anatolian geography on which we live is very rich in terms of cultural heritage as it is one of the rare areas where humanity first appeared, the first civilizations began, science and cultures developed.

There are many works adorned with tiles and ceramics in this heritage. Starting from relatively recent history, these works are referred to as Ottoman – iznik period with technically and aesthetically perfect white tiles and unique decorations made with tiles and bricks in a great architecture of the Seljuk period. Native Art products are both inspired by this unique cultural heritage and contribute to this cultural heritage.

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*

Seljuk Mosaic

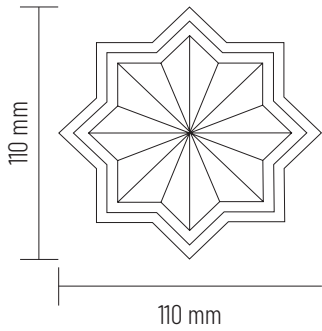

Seljuk Star

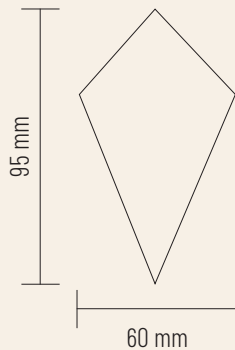

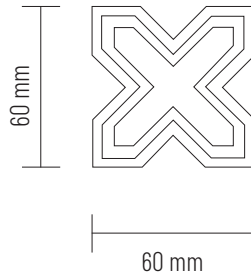

Each corner of the Seljuk Star symbolizes core values such as compassion, patience truthfulness, keeping secrets, loyalty, generosity and praising the lord of the Seljuk and Turkish culture. It has been redesigned and carefully prepared as modular facing brick and ceramic with the relief effect.

The Seljuk Tile Mosaic technique, which is made with the harmony of turquoise eggplant purple and cobalt colors both with each other and with the soil, has been another cultural heritage that we inspired.

FROM MIRACLES OF NATURE
to inspiring textures...

Poseidon Series

The Poseidon Series has formed from the combination of the movement of water, the aesthetic structure of the fish scale, the inspiration from the sea and sea creatures with the character of the sea.

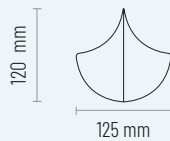

Calm and stormy characters of the sea has been highlighted.

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*

FEEL THE SERENITY OF NATURE
in your living spaces...

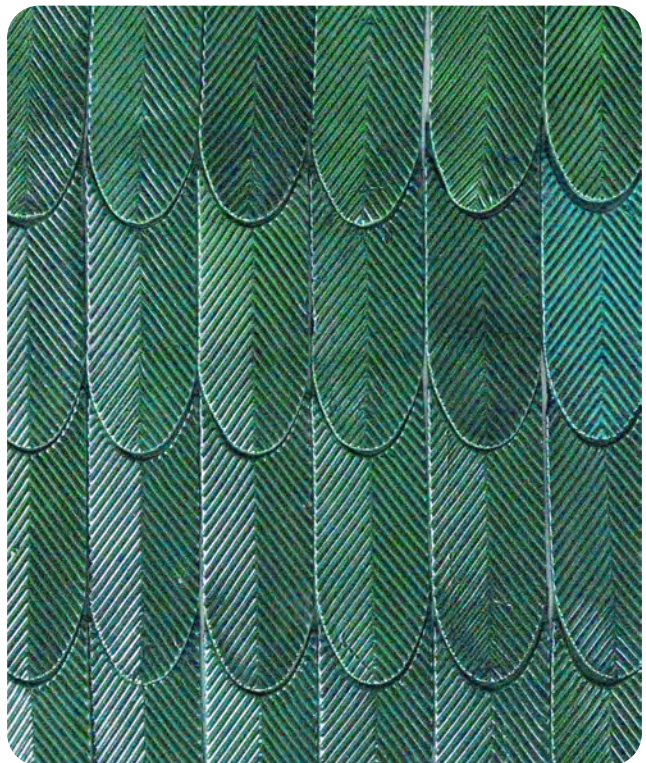

Flora Series

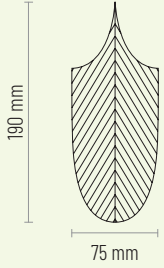

Our designs inspired by the vegetation in nature; it gives life to leaf as in Foglio. Sometimes it transforms to an endless design that comes from the harmony and holism of nature complementing each other as in Segà. Inka reminds of reminiscent of feathers flying between trees and leaves.

We also create new colours filled with the peace of green. Flora Series's designs are a metaphor that request serenity to our chaotic age.

BRING THE MIRACLE OF NATURE
to your living spaces...

Miraculum Series

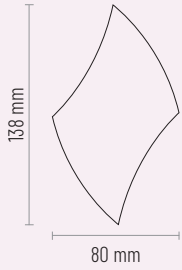

We inspired by the miracles of nature when we designed the Miraculum Series. The source of life is the sun and its warmth, the miracle of being and life. Some designs and colours are a combination of joy and enthusiasm of this inspiration from the energy of light. Like as Luce; an energetic and exciting, inspirational design.

We reflected the inspiration of the water that seeped drop by drop everywhere to Guta. In the miracles of nature, it would not be to be affected by gemstones. Diamond was inspired by the unique crystal structures of natural stones.

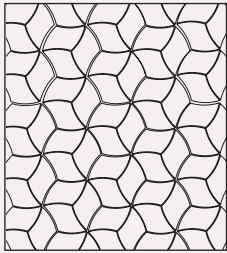

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*

BRING THE AESTHETIC OF NATURE
to your living spaces...

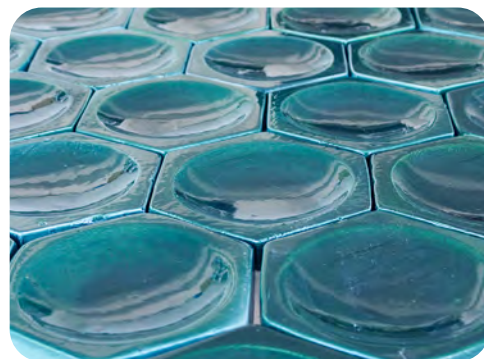

Hexagon Series

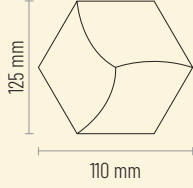

Inspired by honeycomb, which forms nature's miraculous hexagon, the Hexagon Series symbolizes abundance and fertility with its three dimensional effect to your living space. The equilateral triangles that form the hexagonal structure give a feeling of beauty and balance.

Different motifs can be created with hexagons that can be combined without gaps and deep reliefs on the hexagon add movement to your spaces. The pit that settles in the hexagon creates a black hole effect (CAVUM) that swallows everything that passes near it.

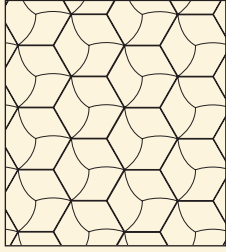

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*

DISCOVER THE HOPE

at the end of long distances...

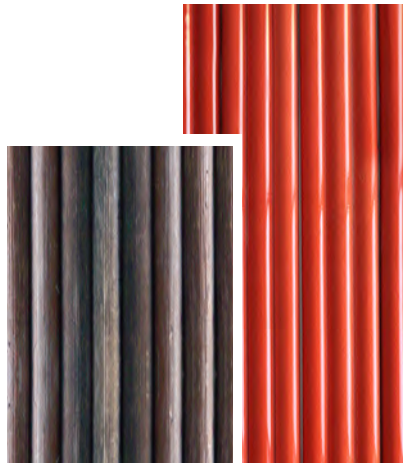

Via Series

Road and dream... Long ceramic designs inspired by the extended roads looks like the dreams established on the journey and integrated with the curved paths that curl inward and flowing outward.

Sometimes, in the end of journeys, dreams are realize or frustrations are happen. Even so the journey will always continue to the future without looking back.

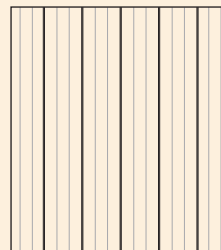

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*

FOR AN ARTISTIC JOURNEY
through time and space...

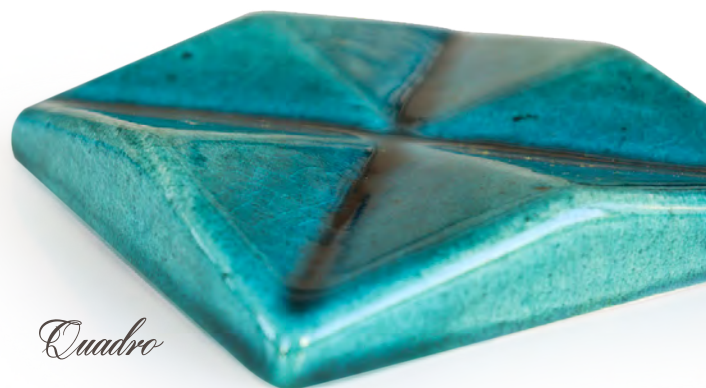

Polygon Series

The Polygon series has been formed with the innovative interpretation of the power reflected by classical geometric shapes. The square evokes a sense of confidence with all its equal sides. The triangle is stable and balance when its base rests on it.

The pyramid, with its wide base and narrowing as you go to the top, related with hierarchy. The regular pentagon with golden ratio creates a magnificent base especially in decorations.

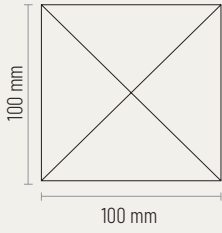

The rectangle evokes nobility, justice and power with its aspect ratio change. A celestial shape, the circle symbolizes modesty with its soft and curved lines.

BRING THE TRACES OF FREEDOM
to your living spaces...

Rustic Series

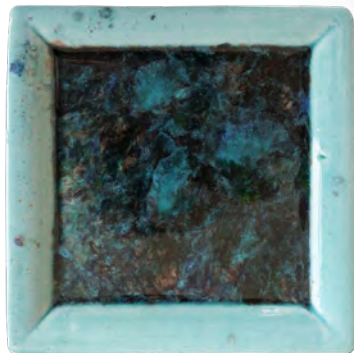

The naturalness of the rustic style, its simplicity and elegance without details are reflected on this series. Generally, on the red terracotta clay, the freedom of the glaze is felt in the effect and color transitions.

Glaze and colors on the body are sometimes flat and calm, sometimes gathered under the influence of an attraction, and sometimes swept over the surface like dew droplets. Let the clay and the glaze dance freely.

**Colour and decor works can be carried out in accordance with customer request. Since our products are handmade and boutique-style manufacturing, there may be colour tone differences within and between product batches.*
